2027 Form 470 bidding information- Oconto Falls Public Schools

- The district is seeking proposals for a 1 Gbps or higher dedicated data transmission/transport connection to its High School, which serves as the District's primary network hub. The connection will transport internet traffic between the District's network hub and its separately contracted Internet Service Provider (ISP), currently WiscNet. The District is seeking transport services only; internet access is obtained separately and is not included in this request. Vendors should identify the proposed service delivery method, available bandwidth options, and associated costs.

- The district is seeking proposals for a dedicated point-to-point data transmission/WAN connection between the District's High School (primary network hub) and Alternative Learning Site at 320 E Central Ave, Oconto Falls, WI 54154 and Bus Garage at 337 Monroe St, Oconto Falls, WI 54154. The connection will provide network connectivity between the three locations, including access to the District's centralized internet connection and other eligible network resources. Vendors should provide pricing for the **existing bandwidth** and available upgrade options, identifying the proposed service delivery method and associated costs.
