Narrative
The applicant seeks bids for eligible Category One broadband services, including Internet access and wide area network data transmission services, to support connectivity for consortium member library locations. Internet service is to be delivered to the consortium hub site and shared across participating entities. In addition, the applicant seeks dedicated fiber Ethernet or equivalent data transmission services to connect member library locations to the consortium hub site. Each participating site requires reliable, high-speed connectivity, including redundant connections where necessary, to ensure continuity of broadband access and operations. The applicant currently receives Internet access and data transmission services under an existing agreement and seeks bids for the continuation or replacement of these services. Solutions proposed must support scalable bandwidth, high availability, and compatibility with the applicants existing network infrastructure. Services may be provided by any qualified vendor capable of meeting the functional requirements described.
