

2027 Leased Lit Fiber WAN

Addendum 1 posted 7/17/2026

This Addendum 1 is posted in response to questions received from interested vendors in accordance with Section **5.3. Q&A Process** in FCC Form **470 270000068 for Funding Year 2027**. Please refer to FCC Form 470 270000068 and it's associated RFP for details about the services eiNetwork is seeking.

Q#	Question	Answer
1	Can you please confirm if vendors can select the locations they wish to bid on?	Per section 5.5.e.iv. "Preference will be given for complete solutions that deliver services to all locations listed under Appendices I & II." And Section 5.11. "However, proposals that fail to respond to all required service locations listed in Appendices I and II, or that omit required pricing or technical documentation, may be deemed non-responsive at eiNetwork's discretion." The total cost to deliver requested services to all locations will be evaluated. The total cost of a proposal for a select number of sites would also have to include all costs for eiNetwork to deliver requested services to the remaining sites not included in the vendor's proposal.
2	Will you accept type2 service?	Per section 5.5.e.iv. and Section 5.11. "eiNetwork welcomes cost-effective alternatives to products or designs which the vendor deems to be worthy of consideration." Type 2 services might be considered if the proposed solution delivers the requested services and addresses the requirements outlined in the 470/RFP.
3	Do you have addresses for North Versailles Public Library and Northern Tier Regional Library - Pine Center?	North Versailles Public Library address would be 1401 Greensburg Avenue, North Versailles, PA 15137. This location is planned for current/future renovations and may not be ready by service start date. Northern Tier Regional Library – Pine Center address is 100 Pine Park Dr, Wexford, PA 15090.

4	Do you have locations today receiving 10G that we can anticipate receiving 10G on day 1?	Determining which sites receive 10G and which receive 1G will be heavily impacted by the costs for each. The only location listed under Appendix I that we can be certain will have at least 10G is CLP – Main Oakland at 4400 Forbes Ave 15213.
