

Clinton-Essex BOCES

FY2027 FORM 470 #270000294

QUESTION & ANSWER

1. Need the coordinates for the new building located at 1447 Military Turnpike.

- a.
2. Will need to have confirmation as to the floor/room service should be terminated in at each facility.
 - a. 1447 Military Turnpike will be terminated on the first floor IT closet. 4" conduit runs into that room from the north and south sides of the building. The 1585 building will also be terminated on the first floor d-mark room where all the other service enters and exits the building using above-ground poles and is attached to the building.
3. Are you requesting a rack mount or wall mount of equipment?
 - a. No network equipment is requested. However, if this question is regarding any cabling/fiber termination boxes or related, a rack mount solution is preferable, but wall mount would be acceptable.
4. With regards to the Dark Fiber, would you like us to quote optics? If so, please be specific as to what optics you will want us to provide.
 - a. No. We can provide our own optics.
5. Can you please clarify the definition that e-Rate uses between populating the tabs for Dark Fiber Option verses IRU Option?
 - a. For the purposes of the pricing attachment, Clinton-Essex is requesting that, if the proposal is for a dark fiber lease, then the Dark Fiber Option should be used. If the proposal is for a Dark Fiber IRU (Indefeasible Right of Use), that the IRU tab be used.
