Procurement Timeline

Task	Due Date
Deadline to Submit Questions	October 29, 2026, 3 pm EST
Posting of Questions/Clarifications	November 2, 2026
Proposal Submission Deadline	December 1, 2026, 3 pm EST

Communications and Questions

All communication with the Applicant regarding this solicitation **must** be emailed and received by the "Deadline to Submit Questions" noted in the "Procurement Timeline." Questions should be directed to all "Form 470 Contacts" listed above, with the Form 470 Number included in the subject line. Failure to include all "Form 470 Contacts" could result in questions going unanswered. Verbal inquiries are not allowed. Clarifications, when applicable, will be posted as an attachment/addendum to the Form 470. Each Offeror is responsible for downloading the current version of the Form 470 and attachments, including any addenda. Applicant reserves the right to ask vendors clarifying questions during the proposal review process.

Contact initiated by an Offeror concerning this solicitation with any other Applicant representative other than those listed as Form 470 contacts is prohibited. Unauthorized contact may result in the offeror's disqualification from this solicitation.

Proposal Instructions

Proposals **must** be submitted by the Proposal Submission Deadline in the Procurement Timeline.

Proposals should be emailed to ALL Form 470 Contacts listed above and include the following:

- Applicant name
- Form 470 number
- SPIN (Service Provider Identification Number)
- Service provider's terms and conditions

- Completed Pricing Attachment

Proposals **must** include **all** costs associated with providing service, including but not limited to:

- Monthly recurring charges (MRC) include any recurring charge related to delivering the services, such as monthly charges for Internet access, IP addresses, basic terminating equipment, etc.
- Non-Recurring Charges (NRC) include any one-time fee other than special construction charges. This includes but is not limited to installation charges, connection charges, and/or basic terminating equipment charges.
- Special Construction Charges (SPC) include one-time costs for deploying new fiber or upgrading network facilities for eligible entities. These charges are non-recurring and include the following components: construction of network facilities, design and engineering, and project management. Offerors should provide special construction details sufficient to support E-Rate review, including route feet, cost per foot, and plant mix where applicable.
- Failure to identify the monthly recurring, non-recurring, and special construction charges will result in the disqualification of the proposal. Respondents are encouraged to provide the estimated taxes and surcharges associated with the service. Submissions indicating that there may be additional MRC, NRC, or SPC related to delivering the services **WILL** be disqualified.

Proposal pricing should be included in the provided Saranac Lake C1 Pricing Attachment and be submitted in xls or xlsx format. Any E-Rate ineligible costs should be clearly identified.

Proposals **must** be in response to the specific requirements of this solicitation. Offers including a generic listing of services beyond the scope of this solicitation and/or encyclopedic price lists will be disqualified. SPAM and/or robotic responses will not be considered valid responses and will be disqualified from consideration.

Applicant reserves the right to consider its existing service as a standing proposal and evaluate it against the other submitted proposals.

Service Requirements

Applicant **requires** a minimum of 300 Mbps download x 10 Mbps upload Internet Access bundled with Transport service to the locations specified in the Saranac Lake FY27 C1 Pricing Attachment. Service providers are requested to submit offers for incremental bandwidths from 300 Mbps up to 1000 Mbps.

We currently have Shared Internet Access (SIA), but we are also willing to consider offers for Dedicated Internet Access (DIA). Proposers should indicate whether the solution is for Shared Internet Access or Dedicated Internet Access.

The term Shared Internet Access (SIA) means that the customer is not guaranteed a specific throughput, but instead the vendor does their best effort to ensure the connection is reliable and meets the stated broadband speeds. Most home and small business Internet offerings fall under the definition of SIA. With

SIA the bandwidth varies based on the number of users on the network at a given time as well as other factors. SIA differs from Dedicated Internet Access (DIA) because the vendor does not guarantee the speeds and the bandwidth is shared among multiple users on the network.

Offerors should provide router/modem lease options and pricing.

To be considered, services **must** be within the specified bandwidth range. Offerors not proposing at least the minimum speed will be rejected. In addition to the specified minimum and maximum bandwidths, Service Providers are encouraged to offer a variety of bandwidth options within this range.

Refer to the provided Saranac Lake FY27 C1 **Pricing Attachment** for the requested service levels. If the exact bandwidths listed are not available, vendors should include their closest comparable service level for consideration.

All solutions must terminate service or infrastructure at the demarcation point within the building, generally, the MDF. Solutions that only bring service to the property line but not to the demarcation point will be disqualified. The agreement must terminate service at an MDF designated by the Applicant. The Offeror should specify the exact demarcation setup included in the base fees, such as wall-mounted CPE and CAT6a handoff, rack mount patch panel, etc.

Offerors must accept responsibility for site delivery, construction, permitting, pathway, and right-of-way costs required to deliver service.

Contract Term and Modifications

Services are needed effective July 1, 2027. If the service cannot be guaranteed by this date, this should be indicated in the proposal, along with an estimated timeline for when the service will be available.

Offers of month-to-month or contracted services will be considered. Service providers submitting proposals for contracted service are requested to provide 12-month pricing. Unless otherwise stated, the customer can voluntarily extend the agreement for two (2) additional twelve (12) month terms. Offers requiring an initial term of more than 12 months will not be considered.

All contracts should permit bandwidth increases during the term. Any such increases, including those during optional renewal periods, will be treated as modifications to the existing agreement rather than new agreements and, therefore, will **NOT** extend the contract's term.

All contracts should include a provision allowing for early termination of circuits without penalty if a location is closed by the Applicant.

All contracts should include a clause allowing additional sites to be added at the existing MRC for the duration of the agreement, with the Applicant covering any one-time charges related to adding the new

site to the network. Any additional sites added will have the same end date as the main agreement.

No price increases will be permitted during the term of the agreement.

Service providers proposing equipment whose prices may increase depending upon new U.S. government tariffs imposed on imports are encouraged to (a) identify such products in their offers, and (b) propose an acceptable methodology for limiting price adjustments over the life of the contract.

Subject to contract restrictions, services may be reevaluated for cost-effectiveness at any time during the life of the agreement including renewal periods.

E-Rate Specific Considerations/Information

Per USAC E-Rate rules, “cost of eligible services” will be the highest valued criterion in the evaluation process; however, other criteria with a lesser value may also be considered.

Service providers proposing a temporary equipment loan for product demonstration and/or evaluation purposes are **required** to clearly state that such loans are of limited duration. Product demos extending beyond thirty (30) days must be explicitly authorized by both parties and provided at a fair market rate.

By submitting a proposal on the requested services herein, the vendor certifies its proposed services and/or products comply with Parts 47 Section 54.9 and 54.10 of the FCC rules which prohibits the sale, provision, maintenance, modification, or other support of equipment or services provided or manufactured by Huawei, ZTE, or any other covered company posing a national security threat to the integrity of communications networks or the communications supply chain. See https://www.usac.org/about/reports-orders/supply-chain/ for more details.

As required by Section 54.500(f) of Part 47 of the Code of Federal Regulations all bids in response to this RFP **must** offer the lowest corresponding price (LCP) which is defined as the lowest price that a service provider charges to nonresidential customers who are similarly situated to a particular E-Rate applicant (school, library, or consortium) for similar services. See https://www.usac.org/E-Rate/service-providers/step-2-responding-to-bids/lowest-corresponding-price/ for more details.

Additional Considerations/Information

Applicant is subject to preference to NYS OGS Contracted Vendors. Public works and purchase contracts for public schools in New York State are governed by the procurement provisions of the State's General Municipal Law. Public Schools may also purchase equipment and services under publicly bid centralized procurement contracts administered by the State's Office of General Services (OGS).

The language in this solicitation has been standardized: "must," "shall," "mandatory," and "required" indicate mandatory specifications that the Applicant expects in the proposed solution. Proposals failing to meet these will be disqualified. "Should" and "may" indicate desirable specifications. A mandatory

requirement may be waived if all respondents fail to meet a mandatory requirement.

Applicant reserves the right to waive any irregularities or informalities in the proposals received.

Applicant reserves the right to award all, part or none of the services set forth in this procurement. This procurement does not obligate Applicant until a valid agreement and/or valid Purchase Order is executed.

Applicant may, at its sole discretion, extend the due date for the submission of proposals and any extensions shall be done via an addendum posted in the E-Rate Productivity Center (EPC.)

The vendor submission is subject to open records requests and, as such, the records will be released in accordance with those policies. Vendors are encouraged to mark pages as "Proprietary" or "Confidential" as appropriate, but the entire submission may not be marked as such. Identifying information as "Proprietary" or "Confidential" does not guarantee that the information will not be released but will be considered in determining whether the information is required to be released in accordance with the open records policies. Generally, pricing is not exempt from being publicly released.

By submitting a proposal, the Offeror certifies that no relationship exists between the Offeror and Applicant that would interfere with a fair and open competition or is a conflict of interest.

Evaluation Criteria

The cost of E-Rate eligible services will carry the greatest weight in the evaluation. Other factors that may be considered include but are not limited to the Applicant's prior experience with the vendor. The Applicant reserves the right to weigh these criteria as it deems appropriate, or not at all, and may consider additional factors not listed above.
