Request for Proposal

I. Introduction

Washington-Saratoga-Warren-Hamilton-Essex (WSWHE) BOCES is seeking proposals, on behalf of the District, from qualified suppliers for the purchase of WAN transport between specified locations of WSWHE BOCES. This bid is published in conjunction with the Universal Services Administrative Corporation E-Rate guidelines.

It is the purpose of this Request for Proposal (RFP) to select a Respondent to provide the product(s) and/or service(s) that will best satisfy the current and future requirements of the district's network infrastructure. This RFP does not commit the BOCES or the District to pay any costs incurred in the preparation of proposals. Further, BOCES reserves the right to accept or reject any or all Proposals or any part of a Proposal, if it is in its best interest to do so. Any factual information contained in this RFP is for informational purposes only, and is subject to independent verification by the Respondent.

II. Description of WSWHE BOCES

The Board of Cooperative Educational Services (BOCES) was created by New York legislation in 1948. Today there are thirty-seven such organizations in the state. Each has its own governing board, elected by the members of the Boards of Education of the component districts. The primary purpose of BOCES is to provide services to two or more member districts more effectively and economically than one district could provide alone. BOCES is an education agency of the state, and must, therefore, adhere to all laws and regulations of the State of New York which govern public schools in the state as well as regulations controlling the BOCES.

- viii. Respondent must be able to provide utilization and performance metrics upon request.
- ix. Service must include 24/7, 365 day Network Engineer support.
- x. BOCES will select the option (bandwidth/term) that best suits the need(s) of the school district being served.

b. Terms for service

- i. Each Respondent is required to complete the attached Pricing Proposal Sheet included with this RFP.
 - ii. Monthly recurring cost and any non-recurring costs (including special construction) are required to be broken out and listed separately on the Sheet.
 - iii. Respondents are free to propose alternate pricing terms provided they have also included pricing in the requested format. Consideration of any alternate pricing terms proposed is strictly at the discretion of BOCES.
 - iv. No increased pricing will be allowed during the term of the quoted special construction, NRC, and MRC rate in each pricing cell of the matrix.
- c.** Any WAN-related fiber cabling, raceways, conduits, equipment, connectors or other components necessary for the fiber links to delivery services between sites must be provided by the RESPONDENT and included in the pricing. **All** costs required to deliver the proposed solution between each school's demarcation point must be included in the bid. By submitting a bid, the Respondent certifies that it has engineered a full solution including all monthly recurring charges, all installation charges and all special construction costs. Costs added to the quote after the Respondent has submitted their bid are solely the responsibility of the Respondent and not the applicant.
- d.** Construction for incoming fiber cable to building entrance (and termination point in the wiring closet) shall be coordinated with the District's use of existing telecommunications pathways from the street to the main data closet, and must be approved in advance by the District.
- e.** If a bandwidth upgrade is requested mid-contract the term length does not reset or renew. For example, if an upgrade occurs in month 20 of a 36-month contract, then 16 months of service must remain on the contract at the new bandwidth before a contract renewal is available.

E-Rate SUPPLEMENTAL TERMS AND CONDITIONS

The Telecommunications Act of 1996 established a fund by which Schools and Libraries across the Country could access discounts on eligible telecommunications products and services. The program is commonly known as the E-Rate Program. The eligibility for discounts on internet access, telecommunications products and services, internal connection products, services and maintenance is determined by the Federal Communications Commission (FCC). Funding is made available upon application approval by the Schools and Libraries Division (SLD) of the Universal Service Administrative Company (USAC), which was established by the Act. The amount of the discount is based on the number of students receiving free and reduced price meals.

1) E-Rate CONTINGENCY

The project herein may be contingent upon the approval of funding from the Universal Service Fund Schools and Libraries Program, otherwise known as E-rate. Even after award of contract(s) and/or E-Rate funding approval is obtained, BOCES and the District may or may not proceed with the project, in whole or in part. Execution of the project, in whole or in part, is solely at the discretion of BOCES and the District.

2) SERVICE PROVIDER REQUIREMENTS

BOCES expects Service Providers to make themselves thoroughly familiar with any rules or regulations regarding the E-Rate program.

- a. Service Providers are required to be in full compliance with all current requirements and future requirements issued by the SLD throughout the contractual period of any contract entered into as a result of this RFP.
- b. Service Providers are responsible for providing a valid SPIN (Service Provider Identification Number) at the time the bid is submitted and maintain good standing with USAC throughout the duration of the proposed contract.
- c. Prices must be held firm for the duration of the associated proposed contract or until all work associated with the project is complete (including any contract and USAC approved extensions).
- d. Vendors shall strive to ensure 100% E-Rate eligibility. However, if 100% eligibility cannot be reached, please itemize the cost of E-Rate eligible and ineligible products, services and installation costs in proposal documents. To determine what items are eligible, visit the E-Rate eligible services list at:
<https://www.usac.org/E-Rate/applicant-process/before-you-begin/eligible-services-list/>

- e. In the event of questions during an E-Rate pre-commitment review, post-commitment review and/or audit inquiry, the awarded Service Provider is expected to reply within 3 days to questions associated with its proposal.
- f. The awarded Service Provider is required to send notice of all forms and invoices to the BOCES prior to invoicing USAC for pre-approval.

3) SERVICE PROVIDER ACKNOWLEDGEMENTS

- a. The Service Provider acknowledges that no change in the products and/or services specified in this document will be allowed without prior written approval from the BOCES and a USAC service substitution approval with the exception of a Global Service Substitution(s).
- b. The Service Provider acknowledges that all pricing and technology infrastructure information in its bid shall be considered public and non-confidential pursuant to §54.504 (2)(i)(ii).
- c. The Service Provider acknowledges that its offer is considered to be the lowest corresponding price pursuant to § 54.511(b). Should it not be the lowest corresponding price, the service provider must disclose the conditions leading to the applicant being charged in excess of the lowest corresponding price.
- d. This offer is in full compliance with USAC's Free Services Advisory <https://www.usac.org/E-Rate/applicant-process/competitive-bidding/free-services-advisory/>. There are no free services offered that would predicate an artificial discount and preclude the applicant from paying its proportionate non-discounted share of costs. The service provider agrees to provide substantiating documentation to support this assertion should the applicant, USAC, or the FCC request it.

4) STARTING SERVICES/ADVANCE INSTALLATION

The annual E-Rate Funding Year begins on July 1 and expires on June 30 of each calendar year. Regardless of the contract "effective date", E-Rate eligible goods and/or services requested in this RFP shall be delivered according to the timeline detailed in Section III. If Category 1 services (Telecommunication Services and Internet access) will begin on or shortly after July 1 of a funding year, the service provider, in some cases, may need to undertake some construction and installation work prior to the beginning of that funding year. Within the limitations indicated below, the infrastructure costs of a service provider can be deemed to be delivered at the same time that the associated Category 1 services begin. That is, if services begin on July 1, then the delivery of service provider infrastructure necessary for those services can be considered as also delivered on July 1.

EARLY FUNDING CONDITIONS

Category 1

There are four conditions that must be met in order for USAC to provide support in a funding year for Category 1 infrastructure costs incurred prior to that funding year.

- *Initiation of installation cannot take place before selection of the service provider pursuant to a posted Form 470 and in any event no earlier than six months prior to July 1 of the funding year.*
- *The Category 1 service must depend on the installation of the infrastructure.*
- *The underlying Category 1 service cannot have a service start date prior to July 1 of the funding year.*
- *No invoices can be submitted to USAC for reimbursement prior to July 1 of the funding year.*

For more information, please refer to the FCC Order involving the Nassau County Board of Cooperative Educational Services (DA 02-3365, released December 6, 2002). This FCC decision only applies to Priority 1 services (telecommunications services and Internet access).

The complete text can be found at the following URL:

<https://www.usac.org/E-Rate/applicant-process/starting-services/>

Category 2

There is one condition that allows USAC to provide support in a funding year for Category 2 installation costs incurred prior to that funding year.

- *We also amend our rules for category two non-recurring services to permit applicants to seek support for category two eligible services purchased on or after April 1, three months prior to the start of funding year on July 1. This will provide schools with the flexibility to purchase equipment in preparation for the summer recess and provide the maximum amount of time during the summer to install these critical networks.*

For more information, please refer to the FCC Report and Order and Further Notice of Proposed Rulemaking (FCC 14-99, released July 23, 2014). This FCC decision only applies to Category 2 services (Internal Connections).

5) INVOICING

- a. The Service Provider agrees to bill and receive a portion of the payment for the provision of goods and services described herein directly from USAC via the Form 474 Service Provider Invoice (SPI). The District will only be responsible for paying its

non-discounted share of costs and does not intend to use the BEAR process (Form 472). The maximum percentage the District will be liable for is the pre-discount amount minus the funded amount as shown on the FCC Form 471 Block 5 and any identified ineligible costs. Upon the successful receipt or posting of a Funding Commitment Decision Letter from the SLD and submission and certification of Form 486, the District shall pay only the discounted amount beginning with the billing cycle immediately following said approval. Alternatively, should BOCES or the District decide that it is in the best interest of the District to file a Form 472, BOCES will inform the Service Provider of its intent.

- b. Products and services must be delivered and completed before billing can commence. All Service Provider invoicing to USAC must be completed within 120 days from the last day of service. Should the Service Provider fail to invoice USAC in a timely manner, the District will only be responsible for paying its non-discounted share.

6) FCC/SLD AUDITABILITY

The E-Rate program requires that all records be retained for at least ten (10) years from the last date of service provided on a particular funding request. Respondent hereby agrees to retain all books, records, and other documents relative to any Agreement resulting from this RFP for ten (10) years after final payment. BOCES, its authorized agents, and/or auditors reserves the right to perform or have performed an audit of the records of the Respondent and therefore shall have full access to and the right to examine any of said materials within a reasonable period of time during said period.

7) PROCUREMENT OF ADDITIONAL GOODS AND/OR SERVICES/COTERMINOUS EXPIRATION

During the term of any Agreement resulting from this RFP, BOCES and the District may elect to procure additional or like goods and/or services offered by the Respondent. Such services shall be negotiated and obtained via an official amendment to this Agreement and approval by the BOCES' Governing Board. All terms, conditions, warranties, obligations, maintenance and support of said goods or services shall have a coterminous expiration date with the original date of this Agreement. The District shall not enter into a separate Agreement for said goods or services. Respondents must state in their proposal that they acknowledge, accept and are in agreement with coterminous expiration conditions.

I, the undersigned, as an authorized agent of _____ (Service Provider Name), hereby certify that I have read the E-Rate Supplemental Terms and Conditions, am fully compliant and intend to cooperate with the E-Rate process as outlined above.
