ADDENDUM NO. 5 RFP 26-110 — Cabling Infrastructure E-Rate Funding Year 2027 (YR30) October 9, 2026

This Addendum is issued as part of RFP 26-110 and forms a part of the RFP documents. It modifies the RFP as set out below. All other terms and conditions remain unchanged.

RESPONDERS SHALL ACKNOWLEDGE RECEIPT OF THIS ADDENDUM by signing the acknowledgement on the last page and returning it with their proposal. Failure to acknowledge receipt of an addendum may render a proposal non-responsive.

Proposals remain due December 9, 2026. The question deadline (October 23, 2026) and the date responses are posted (October 28, 2026) are unchanged. This Addendum is posted on the USAC portal and <https://rocklinusd.org/TechnologyRFP>.

This Addendum is complete as issued and will not be amended. Further questions and responses will be issued as separate, numbered addenda. Responders are responsible for checking the USAC portal or District website for each one.

ITEM 1 — Question and Answer — Addenda of Record

QUESTION RECEIVED

We are reviewing the bid documents for RFP 26-110 – Cabling Infrastructure and noticed that there are two different versions of Addenda 1, 2, and 3, each with different issuance dates and information. Could you please clarify which versions are the official addenda that bidders should follow? Additionally, should we acknowledge both versions of each addendum, or only one?

ANSWER

The District issued final versions of Addendums 1, 2, 3 and 4. The final versions were posted to the USAC portal as stated in the RFP. The addendums posted in the USAC portal are the required documents to be signed by all bidders and returned with their response.

Acknowledge only the addenda of record, posted in the USAC portal. There is one acknowledgement per addendum.

ITEM 2 — Question and Answer — Campus Plans and Network Maps

QUESTION RECEIVED

Please provide or identify the download location for the campus plans and MDF/IDF network maps referenced in Appendix C, including athletic facilities and relocatable room numbers.

ANSWER

The campus site plans are included in the RFP itself. No separate download is required

Rocklin Elementary School site plan — RFP 26-110, page 27

Rocklin High School site plan — RFP 26-110, page 28

A network map will be uploaded to the USAC portal. The District will share this network diagram showing MDF and IDF locations. It is provided for reference in addition to the MDF and IDF detail already given in Appendix C.

ITEM 3 — Question and Answer — Hazardous Materials and Site Access

QUESTION RECEIVED

Are asbestos/lead surveys or other hazardous-material reports available for affected areas? Please identify known access restrictions and confirm responsibility for any required abatement.

ANSWER

Abatement is complete. All hazardous materials abatement at Rocklin Elementary School and Rocklin High School is complete. No abatement work is included in this RFP, no abatement work is anticipated, and no Responder shall price abatement or include a contingency for it.

Reports and documentation. Hazardous materials survey and abatement documentation is held by the District's Facilities Department and is available on request. A Responder that wishes to review it shall request it in writing to ts.rfp@rocklinusd.org and the District will arrange access through Facilities.

Unforeseen conditions. If a Responder nonetheless encounters material it suspects to contain asbestos or lead, it shall stop work in the affected area immediately, leave the material undisturbed, and notify District Technology Services before proceeding. The District is responsible for the identification and lawful abatement of any such material.

Access restrictions. There are no access restrictions. Every building and space within the scope of this RFP is available to Responders at the project walk and during performance of the work. Access remains subject to the Site Conditions and Work Hours requirements of the RFP, including advance District approval for work while school is in session, and to the fingerprinting and criminal background check requirements of Education Code section 45125.1.

ITEM 4 — Question and Answer — Project Walk Sign-In and Bidder Identity

QUESTION RECEIVED

If a representative attends under an existing business name, but the intended bidding entity is subsequently incorporated or reorganized before proposal submission, will the attendance satisfy the mandatory-walk requirement for that entity? What identification or documentation should be provided at sign-in and with the proposal?

ANSWER

Addendum No. 2 provides that attendance at the mandatory project walk is required. A responder that does not attend will be deemed non-responsive. The District's purpose in requiring attendance is that the firm preparing the proposal has seen the existing field conditions. The following applies:

1. Attendance is credited to the individual who attends and to the firm that individual represents at sign-in.
2. Where the entity submitting the proposal is not the entity named at sign-in, the proposal shall include a written statement, on the Responder's letterhead and signed by an authorized representative, identifying the individual who attended, the name under which that individual signed in, and the relationship between that name and the submitting entity — for example a predecessor, successor, parent, subsidiary, affiliate, or a reorganization or incorporation of the same business.
3. Where the submitting entity is a successor to, or a reorganization or incorporation of, the business represented at sign-in, and the individual who attended is employed by or an owner of the submitting entity, attendance is satisfied for the submitting entity.
4. At sign-in, each attendee shall provide legible printed name, firm name, title, telephone number and e-mail address, and shall present photo identification on request. A business card is sufficient identification of the firm.
5. Attendance does not transfer between unrelated firms. A Responder may not rely on the attendance of an individual with no employment or ownership relationship to it.

ITEM 5 — Question and Answer — Differences between reference quantities

QUESTION RECEIVED

Appendix A's site tabs contain extra-run quantities that differ from its Devices tab and Appendix B. Examples include Elementary Buildings B (32 versus 10), C (36 versus 4), and J (24 versus 8), and High School Buildings B (24 versus 4), Administration (48 versus 10), and M (80 versus 1).?

ANSWER

Please see the revised appendix 'A' and revised appendix 'B' uploaded into the USAC portal which will clarify and confirm correct counts.

ITEM 6 — Question and Answer — Classroom counts and building identification

QUESTION RECEIVED

Please reconcile the Elementary G/H room groupings between Appendix A and Appendix B, the High School R relocatable count of 29 versus 30 rooms, and the High School Administration label "259" versus Building E

ANSWER

Please see the revised appendix 'A' and revised appendix 'B' uploaded into the USAC portal which will clarify and confirm correct counts.

ITEM 7 — Question and Answer — Office and computer-lab connections

QUESTION RECEIVED

Are existing office, administrative and computer-lab data outlets to be replaced in addition to the twelve-drop classroom standard? For High School Building M, Appendix A identifies approximately 40 computer stations in each of three labs. Please clarify how those connections are counted and whether the six standard classroom wall drops overlap with existing connections or are additional?

ANSWER

NO, they are part of the 12 drops

ITEM 8 — Clarification

Technical Standards, the Cable Estimate, and the Purpose of the Project Walk

This Item is issued by the District does not change the scope, the specifications or any date. It restates where the governing standards are found and explains what the estimated cable footage in Appendix C is and is not.

A. THE TECHNICAL STANDARDS ARE SET OUT IN THE RFP

The cabling, termination, labeling, testing, documentation and warranty standards governing this project are stated in the body of RFP 26-110. They are not restated in this Addendum and are not modified by it. A Responder shall price and perform to the RFP as written

B. HOW THE ESTIMATED CABLE FOOTAGE WAS DERIVED

Appendix C states the formula the District used, and Appendix C states that the resulting footage is reference only. For clarity:

Estimated Cable (ft.) = Max Length × ((Rooms per Building × Drops per Room) + Extra Cables Needed) × 1.30

Max Length is the longest tested cable run in that building, measured as cable path from the serving switch in the IDF to the furthest drop in that building. That single worst-case length is then applied to every drop in the building, the extra cables identified for that building are added, and a thirty percent (30%) allowance for routing, slack, service loops and waste is applied to the total.

C. THE PURPOSE OF THE PROJECT WALK

The project walk exists so that each Responder can develop its own numbers. The walk on October 10, 2026 gives every Responder the opportunity to walk each building, observe existing field conditions, pathways, ceiling and wall conditions, IDF locations and room layouts, and to take whatever measurements and notes it requires in order to arrive at quantities and lengths it is prepared to stand behind.

Responders are expected to do their own work. Consistent with the ways-and-means basis of this solicitation and with Requirement 17, the District provides no quantity takeoff. Each Responder shall determine, and is solely responsible for, its own cable lengths, cable quantities, material quantities, pathway and support requirements and labor hours. A Responder shall not rely on the Appendix C estimate as a takeoff and shall not submit a price derived from it without independent verification.

Variance from the published estimate is not a basis for a claim. As provided in the RFP on page 29, no claim for additional compensation based on a variance in cable footage, drop counts or material quantities from any figure referenced in the RFP or in any addendum will be considered, except where the District issues a written change in scope.

END OF ADDENDUM NO. 5

ACKNOWLEDGEMENT OF RECEIPT — RETURN WITH PROPOSAL

The undersigned acknowledges receipt of Addendum No. 5 to RFP 26-110 and confirms that its proposal incorporates the modifications set out above.
