Narrative
The McComb School District seeks proposals from qualified vendors to furnish, deliver, install, configure, test, and place into operation a modular rack-mounted Uninterruptible Power Supply (UPS) solution and associated power distribution equipment supporting eligible network infrastructure used to provide districtwide broadband connectivity, Internet access, and internal network services. The proposed solution is intended to replace existing UPS equipment that is no longer functional. The District anticipates the project will include five (5) UPS power modules and all associated components necessary for a complete operational solution, including but not limited to a UPS chassis, battery modules, power distribution units (PDUs), network management components, environmental monitoring components, startup services, installation services, mounting hardware, and related accessories. Equivalent products and solutions meeting or exceeding the minimum specifications contained in the District's RFP will be considered. This procurement is being conducted in accordance with FCC E-Rate Schools and Libraries Program requirements and applicable federal, state, and local procurement laws. Vendors must comply with all FCC, USAC, and E-Rate program requirements, including possession of a valid Service Provider Identification Number (SPIN).
