User information is private

Are the circuits being requested for quote required to be Dedicated Internet Access (DIA), or would any type of internet connection be acceptable?

Nov 6 2026 at 1:56 PM
Arizona School Districts

We're actually not requesting Dedicated Internet Access, but rather Wide Area Network circuits to connect each of the listed locations back to the district hub. If your solution is to provide a Dedicated Internet Circuit to each location and connect them to the hub via VPN or similar, that is acceptable. Just be sure to provide enough detail for comparison to more traditional WAN configurations.

2. Speeds *Nov 6 2026 at 9:09 AM*

Are the listed speeds referring to download speeds, upload speeds, or both?

Nov 6 2026 at 1:56 PM
Arizona School Districts

Both. The upload and download speeds for each circuit must be symmetrical.
