Round Rock Independent School District

Addendum for Dedicated Internet Access

FCC Form 470 270003057 | Funding Year 2027

Addendum 1 November 11, 2026

This addendum answers vendor questions and extends the bidding schedule. Upon issuance, it becomes part of this solicitation and controls any conflicting provision on the subjects addressed below. All other solicitation requirements remain in effect.

Revised bidding schedule

In response to requests for additional preparation time, including vendors request for up to two additional weeks and the Thanksgiving scheduling concern, the District extends the schedule for all prospective respondents as follows:

- **Questions due Monday, December 7, 2026, at 4:00 p.m. Central Time.**
- **Proposals due Monday, December 14, 2026, at 4:00 p.m. Central Time.**

These dates supersede earlier question and proposal deadlines for this solicitation. Submit questions and proposals through the process stated in the RFP. Any further schedule change will be published for all respondents. Previously submitted proposals may be revised or withdrawn before the revised deadline using that same process.

Bandwidth pricing and future upgrades

Question: Does the District require pricing for 10 through 100 Gbps, or only a 10 Gbps circuit capable of later upgrades?

Response: The listed 10 Gbps, two 10 Gbps circuits (2 x 10 Gbps), 40 Gbps and 100 Gbps capacities represent initial service and growth options at the alternative delivery locations in the RFP. Pricing will help determine the starting capacity. Provide pricing for the capacities available to be offered and describe the ability to grow to the other listed capacities. Identify any capacity or location that is unavailable or requires further engineering.

For each priced option, identify nonrecurring charges, monthly recurring charges and other required charges. Distinguish firm pricing from a budget estimate or an option subject to engineering. If higher-capacity pricing cannot yet be provided, explain the limitation, design work, approvals and lead time required. Do not leave an option blank without explanation or represent unverified future capacity as guaranteed. For 2 x 10 Gbps, describe the circuit arrangement, usable capacity and any shared facilities.

The District seeks the ability to grow during the contract term; no future upgrade or purchase of all listed capacities is guaranteed. Explain whether quoted upgrade pricing can be exercised during the term and disclose any restrictions.

Scope and solicitation identification

DIA delivery locations remain the Technology Center or Bluebonnet Elementary School as specified in the RFP. Standalone transport to LEARN is addressed separately under FCC Form 470 270003062. RRISD's Westwood to PDC fiber clarification applies to that transport solicitation and does not add Westwood as a DIA delivery site.

Acknowledgment

Identify this addendum by its assigned number and issue date in the proposal. The evaluation criteria, service commencement date and contract terms remain as published, except as expressly modified by an issued addendum.
