RFP #2026-012 Dedicated Internet Access Service

QUESTIONS AND ANSWERS NO. 1

Posted Date:	November 10, 2026	**RFP Due Date:**	December 1, 2026 - 2:00 PM
Source:	Vendor Question	**Addendum Required:**	No

Question 1
Would a LAG configuration utilizing bonded 10 Gbps Ethernet links be considered compliant with the bandwidth requirements of the RFP?
Question 1 - District Response
A LAG configuration may be proposed, provided it delivers the full contracted symmetrical bandwidth, is compatible with District edge-routing equipment, and meets all other DIA performance and availability requirements. The Proposal shall clearly identify the number and speed of member links and any technical limitations.
Question 2
Will the District accept either 10 Gbps or 100 Gbps Ethernet interfaces, or is a specific interface speed required?
Question 2 - District Response
The District will consider either 10 Gbps or 100 Gbps Ethernet interfaces where appropriate for the proposed service. The handoff must support the contracted bandwidth, be compatible with District edge-routing equipment, and include all required optics or other components. Proposers shall clearly identify the proposed interface speed and transmission medium.

Clarification Statement

Unless specifically stated otherwise, the responses in this Questions and Answers document clarify but do not modify the requirements of RFP #2026-012. All other terms, conditions, specifications, dates, and requirements of the RFP remain unchanged.
