RFP #2026-012 Dedicated Internet Access Service

QUESTIONS AND ANSWERS NO. 2

Questions from the Zoom Meeting held on 11/12/2026 at 11:00 AM PST.

Posted Date:	November 12, 2026	**RFP Due Date:**	December 1, 2026 - 2:00 PM
Source:	Vendor Question	**Addendum Required:**	No

Question 1
It it looks for an initial term, which I guess I'm guessing that we could say whatever term we want. We'll say we pick 36 months. And then, it says extension 1 month, or… are you looking for a price for a 1 month extension from a 3 year, or…?
Question 1 - District Response
Vendors may propose their preferred initial contract term. The Extension 1 and Extension 2 columns represent the duration, in months, of each optional extension period, not the number of extensions. For example, a vendor could propose an initial term of 36 months, followed by two optional 12-month extensions, for a total potential contract term of 60 months. Enter 0 if no extension is offered. The corresponding MRC Escalation % columns should indicate any proposed increase to the monthly recurring charge during each extension period. Vendors should also indicate whether the proposed rates will remain fixed throughout the extensions.
Question 2
What is the target IP block? Are you looking for a /29, /30, what would be the target?
Question 2 - District Response
The District requires a /30 public IPv4 subnet for the Internet service.
Question 2
Will there be an addenda issued for questions and answers on this one? And if so, will there also be an extension?
Question 2 - District Response
The District will post a Questions and Answers (Q&A) document containing questions received and the District's responses. At this time, the District does not anticipate extending the proposal submission deadline. Should any changes to the RFP or submission deadline become necessary, they will be communicated through a formal addendum.

Clarification Statement

Unless specifically stated otherwise, the responses in this Questions and Answers document clarify but do not modify the requirements of RFP #2026-012. All other terms, conditions, specifications, dates, and requirements of the RFP remain unchanged.
