Narrative

The purpose and intent of this Request for Proposals (RFP) is to seek proposals from interested, available and qualified firms to provide secure prices and establish a Term contract for Network Electronics, under the Universal Service Fund (E-Rate). An agreement will then be entered for the selected firm (Contractor) to provide the described system for Duval County Public Schools (DCPS or the District).

Quantities on this Form 470 are estimates. All details on specifications, bandwidths, requirements, and terms are outlined in REQUEST FOR PROPOSALS (RFP) NO. 09-27- LM Network Electronics. There is a copy of the Request for Proposal (RFP) submitted with this Form 470 on USAC's website. However, the original RFP and all prevailing documents, including addenda, are posted at the district website at the following URL: https://www.demandstar.com/app/limited/bids/557254/details

No verbal or written information which is obtained other than by information in this document or by addendum to this RFP will be binding on the district. Any questions or requests for clarification regarding this RFP shall be submitted to Louis Mitchum, Purchasing Services in writing via e-mail at mitchuml@duvalschools.org. The deadline for such questions or requests will be 12:00 noon, EDT on November 23, 2026, unless otherwise extended in writing by the district. Questions or requests for clarification received after the deadline will NOT be addressed. Note that Proposers are requested to submit questions regarding this RFP for the Districts clarification via issued Addenda, instead of Proposers taking exceptions to any terms or conditions of this RFP within the submitted proposal.

The compilation of written questions and official responses will be issued by the Department of Procurement Services in the form of addenda and placed on the districts website at: https://www.demandstar.com/app/limited/bids/557254/details and as part of this FCC Form 470 posting in the E-Rate Productivity Center.

No verbal or written information obtained other than by information in this document or by written addendum to this bid will be binding on the District. Please note that while the district is seeking a one-time capital investment in infrastructure, if a service provider's solution contains some elements of the service types "Basic Maintenance of Internal Connections" (BMIC) and/or "Managed Internal Broadband Services" (MIBS) as defined by the manufacturer and the 2027 Eligible Services list, the district will evaluate these proposals as long as they meet the RFP requirements.

SPAM and/or robotic responses will not be considered valid Proposals and will be disqualified from consideration.

State and Local Procurement Restrictions

Applicant may consider multi-year contracts and/or contracts containing voluntary extension options. Any voluntary extension option must be stated in the awarded contract and must specify the number and duration of the available extensions. Automatic or evergreen renewal terms will not be accepted by the Applicant. For all Internet Access and WAN contracts, the original contract must include any available options to increase bandwidth or service speeds, together with the corresponding pricing or a clearly defined pricing methodology. Any subsequent amendment must remain within the scope and terms established by the original competitively bid contract and may not introduce new speeds, pricing, services, or other material terms that were not included in the original agreement.Applicant may also consider contracts with flexible terms that allow services, sites, users, quantities, and/or bandwidth to increase or decrease during the contract term, subject to applicable E-Rate program rules and state and local procurement requirements. Service Providers submitting proposals in response to this FCC Form 470 must comply with all applicable Federal Communications Commission (FCC) rules and orders, Universal Service Administrative Company (USAC) requirements, and applicable state and local procurement laws. Failure to comply may result in denial or recovery of E-Rate funding and other enforcement action. Service Providers must comply with the Lowest Corresponding Price (LCP) requirements in 47 CFR Sections 54.500 and 54.511(b). A Service Provider may not submit a bid for or charge the Applicant a price above the lowest price the Service Provider charges similarly situated non-residential customers for similar services, unless an applicable exception has been authorized. Service Providers must comply with USAC's Free Services Advisory. All discounts, promotional offers, rebates, credits, and free products or services associated with a proposal must be clearly disclosed and properly allocated. Their value must be deducted from the pre-discount price when required, and no arrangement may directly or indirectly reduce the Applicant's required non-discount share or shift the cost of ineligible or unrequested products or services to E-Rate-funded items.During the USAC Form 471 application process, the Applicant will select the applicable invoicing method in accordance with E-Rate program requirements. For Service Provider Invoicing (SPI), the Service Provider must timely submit invoices to USAC for the discounted share and must first bill the Applicant for the non-discounted share and any ineligible costs. For Billed Entity Applicant Reimbursement (BEAR), the Applicant must pay the Service Provider in full before seeking reimbursement. All parties must comply with the applicable Invoice Deadline Date under 47 CFR Section 54.514, including any timely requested extension, rather than relying on a single deadline measured only from the last day of service. Pricing and technology infrastructure information submitted as part of an FCC Form 471 will be treated as public and non-confidential in accordance with 47 CFR Section 54.504(a)(2), unless a valid statute, rule, court order, or other applicable restriction bars public disclosure. Contracts and agreements executed after the adoption of that rule may not prohibit disclosure of pricing or technology infrastructure information, and the exception for an existing contract limitation does not apply to voluntary extensions or renewals. This language is provided as a compliance review and guide, not as legal advice.
