Questions Received with Applicant Answers (Ask Questions?)

Carroway Holdings LLC is evaluating functionally equivalent equipment for IFCB 270004735. Please clarify: 1. For Project A, does compatibility with the existing Cisco Meraki dashboard require native management of the replacement firewall within that dashboard, or may we propose Check Point firewalls with their own included management platform, documented network/VPN interoperability, and five years of licensing/support? If native dashboard management is mandatory, please confirm. 2. For Project B, would functionally equivalent switches and tri-band Wi-Fi 7 access points managed through the proposed manufacturer's included cloud platform be accepted, or must all replacement switches/APs be natively managed in Meraki dashboard? 3. Are the two Project A firewalls for independent sites or an HA pair? Please provide required inspected/VPN throughput, WAN/LAN interface speeds, VPN peer/remote-user counts, and whether they must support the possible 10 Gbps internet upgrade. 4. The same firewall hardware and five-year licenses appear under Internal Connections and BMIC. Should these be offered once, with eligible/ineligible costs and IC/BMIC allocations separately identified, rather than duplicated?

Answer:

Q1: Proposed firewalls must be natively managed within the District’s existing meraki cloud management platform. Firewalls requiring a separate management platform do not meet the requirement.

Q2: Proposed switches and access points must be natively managed within the District’s existing meraki cloud management platform.

Q3: The two firewalls are an HA pair at Fraser Valley Elementary School. Requirements:

- Inspected/VPN throughput: 4gb/s
- WAN/LAN interfaces: 2 minimum
- Site-to-site VPN peers: 1
- 10 Gbps internet upgrade: the firewalls must support a 10 Gbps WAN connection

Q4: Please offer the firewall hardware and five-year licensing once, not duplicated across categories, you can include that in the Internal Connections section. Price hardware and licensing as separate line items, clearly identify eligible and ineligible costs (for example, advanced security features beyond basic firewall functionality).
