Narrative

West Valley School District #208 is requesting proposals for a self-provisioned, district-owned fiber network or services provided over a third-party network, or equivalent technologies capable of meeting the same performance and scalability objectives for the locations identified in the line items portion and recipients of service portion of the attached RFP. The goal of this project will be to provide a network infrastructure that will be cost-effective, create a robust and reliable wide area network (WAN), and provide scalability for future needs. Partial (per site) responses are allowed; WVSD #208 may award by site and/or to multiple providers. Regardless of the chosen option, the district's primary concern is ensuring reliable connectivity to the central office. The path the fiber takes to get there is a secondary consideration.

A site visit is encouraged, but not mandatory. This visit is intended for interested providers to get a better understanding of the demarcation points for consideration in their bids. The optional site tour for all parties is scheduled on 12/15/2026. Bidders may contact RFPinquiries@WVSD208.ORG to schedule.

The district recognizes that the geographic distribution of its elementary schools presents both opportunities and challenges for network design. The majority of the in-town schools are located within close proximity to one another and to the district office, which may support cost-effective implementation options. However, certain locations may be affected by distance, terrain, or other geographic factors that could influence the overall scope and cost of the project.

The district's primary objective is to ensure reliable and scalable connectivity between each school and the central office. The specific transmission path, design, or technology employed to achieve this connectivity will be determined based on cost-effectiveness and compliance with all E-Rate requirements. The district will consider all eligible solutions that meet its performance and reliability goals.
A potential approach to reduce overall cost may include establishing a high-capacity connection between two key facilities, such as the district office and a centrally located elementary school, to serve as a backbone. This backbone would provide sufficient capacity to extend connectivity to other elementary schools, creating a secondary aggregation point that allows subsequent connections to be shorter and more cost-efficient as they extend outward from that hub.

The district will accept full, partial, and/or per-site bids and reserves the right to award contracts to multiple vendors if doing so is determined to be the most cost-effective means of achieving reliable, compliant service across all sites.

Please see attached RFP for specific proposal requirements and detailed scope of work.
