Appendix B – Core Location, Current Topology, Dual-Path Arrangement, and Wired/Wireless Demarcation

Core location	The CPS cores are at the CPS data center in the Education Center, 2651 Burnet Ave., Cincinnati, OH 45219 (Appendix A site BOED), shown as the box labeled "BODC" on page 5 of this document.
Current topology	The following pages show the current wired switch topology at each site.
Dual-path arrangement	The aggregate core handoff is currently delivered through two 30 Gbps load-balanced paths (60 Gbps aggregate) to two high-availability cores.
Wired/wireless demarcation	The wired network ends at the access point (AP). The wired service includes the switch and the switch port serving each AP. APs and wireless management, including the cloud-based wireless controllers, are under the separate Managed Wi-Fi contract and are outside this procurement.
Not included	Internet access, and any Internet-provider equipment shown on the map, are outside this procurement.
