RFP and Summary

Is the HCP likely to request more than \$100 000 in program support from this request for services?: No

Do state, Tribal, or local procurement rules require the HCP to include an RFP with this request for services application?: No

Will the HCP be including an RFP with this application?: No

Summary of the HCP's requested services. :

Tioga Medical Center currently utilizes an Internet, Ethernet and another Ethernet Network Managed Network VPN. These services and bandwidth provide data and voice, exchange of medical records, exchange of radiographic and patient images files, video conferencing and training. The Network Managed Ethernet VPN (NWAIT) is a consortium of 5 hospitals that have a common EMR software vendor. The vendor (Healthland, CPSI) requires the hospitals to host their EMR platform (Centriq) in a cloud solution. The DCN NWAIT Ethernet provides hospitals with a centralized managed service (IPSEC VPN) that connects to the TruBridge datacenter for printing information from their perspective Centriq servers back to the local hospitals. No other services or upgrades are planned at this time. If new contract language is sufficient and MRCs comparable with current prices, a 3-5 year contract would be considered.
