Narrative

The school is seeking a growth path for all services due to the growth of our online applications and because the curriculum is using more online resources. The school is seeting internet access over fiber in teh fange of 50 to 200 Mbps with five static IP addresses and all necessary itemes to make this work.
Pricing is requested a 100 ad 150 Mbps.
Vendors with multiple offers in the same product line should offer discounts so the school can move up and down in the product line during life of the contract. It would be advisable to present pricing on the array of services, so while under contract, the school can migrate easily without negotiating a new contract. All contract documents must be submitted with the proposal by all responding vendors.
All services should be installed so billing is effective no sooner than 7/1. The pricing within the proposal should include recurring costs, installation (labor and materials) and any construction cost stated upfront or it will disqualify the vendor. No offer will be accepted without the construction cost stated upfront.

Terms and conditions should include: 1) A business downturn clause to eliminate termination liability or provide protection from penalties if school enrollment declines, requiring a significant change in services or end of service, 2) Monthly to multi-year (one, three and five year) agreements with options to renew service or accept voluntary extensions, 3) The option in your contract for the client to proceed with or without E Rate funding or to decline the product or service if E Rate doesn't fund the school in that area, 4) No automatic renewal as a standard option. The school would like the option to choose to renew or not as well as the opportunity to accept a one or two year extension.
