Narrative
I am seeking new switches for each district closet (12 closets) to unify our network under a common platform and generation, and capability. I am seeking switches and managing platform to allow expansion and insight into our evolving network usage and future needs. The network I am seeking will further strengthen not only the wired infrastructure within each entity, but more importantly provide a higher level of service to our existing wireless infrastructure. The network must be fully capable of providing 802.11ac levels of service to our Ruckus WAPs. I am seeking solutions to enable minimum 10Gb fiber links between our campus buildings. We currently have district owned 1Gb fiber from approximately 15 years ago (before my time). I am unsure of its capability for 10Gb and of the exact distance of the fiber runs. Adjustments, upgrades or new fiber runs are being sought to ensure full 10Gb capability. We are seeking 2 ethernet drops to each of our 88 current APs and any more APs we may purchase based on our assessed need based on usage and client density referred to in our original 470. This will provide redundancy and increased bandwidth to allow for full 802.11ac compliance ensuring equitable access to all relevant wireless clients. This is a priority in our network which consists overwhelmingly of wireless devices and will be rapidly increasing both number and bandwidth required. I am seeking new racks that may be deemed necessary in replacement of or in addition to all currently existing racks to allow for proper placement, cooling and overall performance of any new switching and cabling sought and procured.
