

Parkland RFP 470-Form #230005204 Addendum #2

Released – December 20, 2022

In addition to accepting proposals for a 5-year term contract as previously defined in the RFP, we are also requesting proposals for a 3-year term contract which includes two optional, 1-year extensions as part of the contract.

Complete proposals should include the following pricing:

- The 5-year term contract would be July 1, 2023 – June 30, 2028 at 10 Gbps.
- The 3-year term contract would be July 1, 2023 – June 30, 2026 at 10 Gbps. The district may elect to terminate the contract at the end of this term with no early termination penalty.
- The first optional, 1-year extension would be July 1, 2026 – June 30, 2027. Pricing must be provided for both 10Gbps and 40Gbps for this extension. The district may elect to terminate the contract at the end of this 1-year extension with no early termination penalty.
- The second optional, 1-year extension would be July 1, 2027 – June 30, 2028. Pricing must be provided for both 10Gbps and 40Gbps for this final extension.

Here are additional detailed technical requirements for all proposals:

- Our HPE switches are the only allowable network equipment to interface with the network transceiver modules (SFPs), which must be provided by the awarded service provider to pass the lit fiber connections directly.
- The awarded service provider must provide all Network Transceiver Modules (SFPs) as distance requires to achieve 10Gbps or 40Gbps lit fiber connections to our HPE switches. SFPs must be installed at both ends of the connection by the service provider.
- No other network equipment will be permitted at the either Parkland High School or the remote sites.

All proposals will now be due by **January 18, 2023 by 4pm EST**. Proposals that are submitted after this extended deadline will not be accepted or reviewed.
