

RFP for upgrade of Lit Fiber to 1 gigabit up and down.

We are requesting to upgrade our current Lit Fiber line of 500 MB up and down to 1 Gigabits up and down. We have recently upgraded our entire network infrastructure to accommodate a 1 Gigabit Lit Fiber line. This is a much needed upgrade for the plethora of bandwidth intensive application we use on our campus. This upgrade will allow better utilization of time spent on educational application that require a great deal of bandwidth. The lag time we have seen will become non-existent with this new 1 Gigabit Lit Fiber upgrade.
